Quality Bearings and Components is a sales and engineering oriented company. We advise customers as to the selection of inventory that complements their market. We are staffed with an inside sales department capable of providing pricing, product information, buying programs, cataloging and technical help. We offer you value-added services including: JIT deliveries, blanket orders, relubing, plus custom-made bearings for your specific application environment.

Quality Bearings and Components is an authorized distributor for some of the world's largest bearings and linear motion manufacturers.

Quality Bearings and Components has in stock: miniature bearings, plastic bearings, ceramic bearings, rod ends, spherical bearings, pillow blocks, sintered bronze bushings, radial ball bearings, thrust bearings and washers, sleeve bearings, needle bearings and inner races, roller clutches, guide wheels and rail systems, linear ball bearings, and inner and outer ring spacers. **Quality Bearings and Components** stocks both inch and metric sizes including the following materials: chrome steel, stainless steel, Acetron, Nylon and PTFE. We strive to provide you with the highest quality products at the lowest possible cost. Please feel free to call us any time the subject of bearings comes up. We want to be your bearing company.

Please call our bearing specialists at 888-276-4787 to discuss your next requirement.
